## Putting it together: YOLO algorithm

Andrew Ng

## Making predictions

## Outputting the non-max supressed outputs

2개의 앵커박스를 사용한다면, 어떤 predicted bounding

- box는 매우 낮은 확률(pc값)을 가질 수도 있지만 어쨌든

  For each grid call, get 2 predicted bounding boxes.
- Get rid of low probability predictions.
- For each class (pedestrian, car, motorcycle) use non-max suppression to generate final predictions.
